

## Paper Packrat!

You can craft your very own packrat to rule over its own collection of treasures. Follow these directions:

1. Fold the paper pattern in half along the dotted line with the lines facing out.
2. Hold the folded paper pattern-side up and cut through both layers along the solid lines. You will end up with a few extra parts.

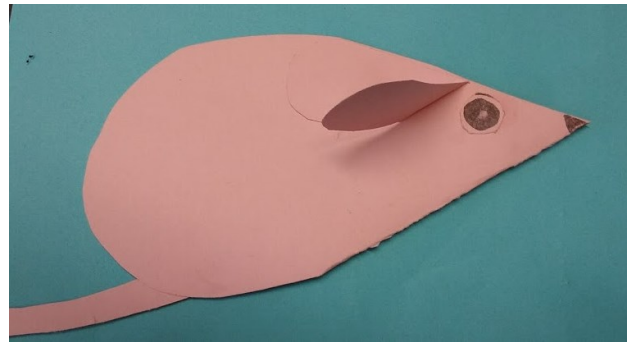

3. Assemble the packrat as follows:

A) Keep the heart-shaped body folded in half.

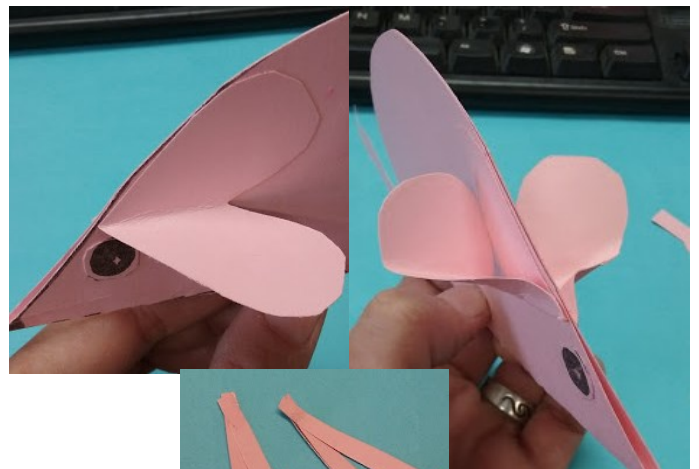

B) Select one of your tails and glue it in to the rear of the body, then glue the body together.

C) Glue the eyes on either side of the face above the nose (there will be two blank circles you won't need.)

D) Attach one ear by gluing half of the heart against the face. Bend the loose ear flap at the tip of the heart to make the ear stick out. Repeat for other side.

E) Glue the two sets of whiskers together at the straight end. Glue them to each side between the eye and nose.

F) Attach the legs to the body and bend the feet a little so that the packrat can stand flat.
